root@mint:/home/mint# systemctl status docker

● docker.service - Docker Application Container Engine

Loaded: loaded (/lib/systemd/system/docker.service; enabled; vendor preset: enabled)

Active: active (running) since Mon 2023-05-08 23:56:36 UTC; 38min ago

TriggeredBy: ● docker.socket

Docs: <https://docs.docker.com>

Main PID: 2910 (dockerd)

Tasks: 9

Memory: 310.2M

CPU: 30.825s

CGroup: /system.slice/docker.service

└─2910 /usr/bin/dockerd -H fd:// --containerd=/run/containerd/containerd.sock

root@mint:/home/mint# docker run hello-world

Hello from Docker!

This message shows that your installation appears to be working correctly.

To generate this message, Docker took the following steps:

1. The Docker client contacted the Docker daemon.
2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
(amd64)
3. The Docker daemon created a new container from that image which runs the executable that produces the output you are currently reading.
4. The Docker daemon streamed that output to the Docker client, which sent it to your terminal.

To try something more ambitious, you can run an Ubuntu container with:

\$ docker run -it ubuntu bash

Share images, automate workflows, and more with a free Docker ID:
